

Conductivity Sensors

Contacting Conductivity Sensors

Contacting conductivity sensors are ideal for use in cooling towers and boilers, reverse osmosis equipment, and other non-oily applications.

Contacting conductivity sensors measure conductivity of a solution via electrodes. A variety of cell constants are available to handle a range of conductivities. They are available in several different configurations:

Cooling Tower Contacting Conductivity Sensors

These cell constant 1.0 sensors are designed for cooling towers with water up to 30,000 $\mu\text{S}/\text{cm}$ (range varies with solution temperature, see next page). Lower pressure (up to 150 PSI, 10 bar) polypropylene sensors are available with graphite or stainless steel electrodes, and may be installed inline or submersion. High pressure (up to 300 PSI, 20 bar) inline sensors are constructed from stainless steel and PEEK.

WebMaster controllers require active sensors. These sensors contain electronics to convert the sensor signal to a voltage that these controllers can read. W400 series controllers use passive sensors that have cables dressed specifically for them. W100, W900, W600 and Intuition series controller's passive sensors are dressed differently.

Performance specifications vary with the type of controller, refer to the controller brochure. Typical cooling tower temperatures are 0 to 70°C, 32 to 158°F.

Boiler Contacting Conductivity Sensors

These cell constant 1.0 sensors are designed for boilers with water up to 30,000 $\mu\text{S}/\text{cm}$ (range varies with solution temperature, see next page) and pressures up to 250 PSI, 16.7 bar). These inline sensors are constructed from stainless steel and PEEK.

For the W100, W400, W900, W600 and Intuition series controllers, a cell constant 10.0 sensor is available designed for boilers with water up to 300,000 $\mu\text{S}/\text{cm}$ (range varies with solution temperature, see below).

WebMaster controllers require active sensors. These sensors contain electronics to convert the sensor signal to a voltage that these controllers can read. W400, W600, W900 and W100 series controllers use passive sensors.

Performance specifications vary with the type of controller, refer to the controller brochure. Typical boiler temperatures are 0 to 205°C, 32 to 401°F.

IWAKI America Inc.

W100/W600/W900/Intuition Contacting Conductivity

General Purpose Contacting Conductivity Sensors (for W100, W900 W600 and Intuition Series Controllers ONLY)

These passive sensors are available in a variety of cell constants for use in conductivities up to 300,000 $\mu\text{S/cm}$ (range varies with solution temperature, see below). Typical applications include RO systems and boiler condensate monitoring. They may be mounted inline or submersion, using either polypropylene (0-100 °C/32-212 °F, 100 PSI/6.9 bar) or stainless steel (0-120 °C, 200 PSI/13.8 bar) 1/2" NPT mounting fittings. These inline sensors are constructed from stainless steel and PTFE with EPR o-rings.

Electrodeless Conductivity

Electrodeless conductivity sensors measure conductivity of a solution utilizing encapsulated, non-contacting, toroidal technology.

They may be installed in a variety of very harsh chemical control applications, including oily cleaner baths, chromates, rinse tanks, fume scrubbers and other concentrated chemicals up to a conductivity of 1000 mS/cm (range varies with solution temperature, see below).

The non-contacting, toroidal sensor technology is immune to thin coatings and the contamination and calibration problems that direct contacting sensors are prone to.

- CPVC, PEEK or GFRPP construction
- In-line or submersion

W400 and WebMaster controllers require active sensors. These sensors contain electronics to convert the sensor signal to a voltage that these controllers can read. Each sensor is specific for the range of conductivity that it can detect (range varies with solution temperature, see below).

Temperature °C/°F	0/32	10/50	15/59	20/68	25/77	30/86	35/95	40/104	50/122	60/140	70/158	80/176	90/194	100/212	110/230	120/248	130/266	140/284	150/302	160/320	170/338	180/356
